## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-22, drawn to a cross-copolymerized olefin/aromatic vinyl compound/diene copolymer characterized in that it is obtained by cross-copolymerizing an olefin/aromatic vinyl compound/diene copolymer with an olefin/aromatic vinyl compound copolymer which may contain a diene, classified in class 525, subclass 244, 245, 248, 256, 268, and class 526, subclass 170, 347.
  - II. Claim 23, drawn to an olefin/aromatic vinyl compound/divinylbenzene copolymer, classified in class 525, subclass 242.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and of Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and different effects because the invention of Group II does not require a cross-copolymerization=interpolymerization.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1711

4. During a telephone conversation with Corwin Umbach on June 17 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-22. Affirmation of this election must be made by applicant in replying to this Office action. Claim 23 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Double Patenting***

6. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

7. Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,566,453. This is a double patenting rejection.

Art Unit: 1711

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 2-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-78 of U.S. Patent No. 6,566,453. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-78 of Patent 6,566,453 discloses an olefin/aromatic compound/diene copolymer cross-copolymerized with an olefin/aromatic vinyl compound copolymer which may optionally contain a diene. The difference between the present claims and the claims of Patent 6, 566,453 is that the claim 2 of the Patent 6,566.453 discloses "the aromatic vinyl compound content of the cross-copolymerized copolymer is different by at least 5 mol % as compared with the olefin/aromatic vinyl compound/diene copolymer prior to cross-copolymerization". The present claim 2 discloses "different by at least 2mol%". It would have been obvious to one of ordinary skill in the art to consider that the difference by at least 2 mol% in the present claims is overlapping by at least 5 mol% in the claims of Patent 6,566,453 since there is no upper level of a limitation of the aromatic vinyl compound content for the

Art Unit: 1711

cross-copolymerized copolymer in the present claims nor in the claims 1-78 in the Patent 6,566,453.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is relevant to show the state of the art knowledge.

The certified copies of the priority documents JP 11-258618 09/13/1999 and JP 2000-184053 06/20/2000 have been received in the National Stage application from the International Bureau (PCT Rule 17.2(a)) as indicated in the parent case 09/831,358.
